

Preface

The 2024 International Conference on Social Development and Intelligent Technology (SDIT2024) is a prestigious gathering that stands at the forefront of innovation and progress. This conference serves as a platform for global experts, researchers, policymakers, and technology enthusiasts to exchange ideas and present groundbreaking research at the intersection of social development and intelligent technology.

With a focus on the United Nations' Sustainable Development Goals, the conference aims to address challenges and explore solutions that leverage the power of artificial intelligence, big data, the Internet of Things, and other advanced technologies to foster social equity, environmental sustainability, and economic growth. Participants can expect a rich program featuring keynote speeches from leading authorities, panel discussions on the most pressing issues, and workshops that delve into practical applications and future trends.

The 2024 conference is designed to be a catalyst for change, inspiring actionable insights and collaborative efforts to harness intelligent technology for the betterment of society. Join us for this exciting event where thought leaders and changemakers will come together to shape the future of social development in the age of intelligence.

With best regards,

Conference Committee of SDIT 2024
